This plan is AI-generated based on your real academic performance data from MongoDB.

Overall Performance Summary

Exam	Marks	Out Of	Status
Internal 1	80	100	Strong
Internal 2	85	100	Strong
Internal 3	90	100	Strong
Average	Highest	Lowest	Improvement
85%	90/100	80/100	+12.5%

Performance Trend: Improving (+12.5% change from first to last internal)

Weak Topics — Needs Immediate Attention

No weak topics! All topics are at 60%+

Strong Topics — Well Mastered

- Functions [93%]
- OOP [91%]
- File Handling [82%]
- Exception Handling [83%]

Ø<B̄ COURSE OUTCOMES (CO) ATTAINMENT

Course Outcome	Attainment %	Status
CO1	81%	High
CO2	82%	High
CO3	83%	High
CO4	84%	High

Highest CO: CO4 (84%) | Lowest CO: CO1 (81%)

7-DAY STUDY TIMETABLE

Day	Morning (2 hrs)	Afternoon (2 hrs)	Evening (1 hr)
Monday	Review Python Programming notes	Practice problems from textbook	Revise today's material & notes
Tuesday	Review Python Programming notes	Practice problems from textbook	Revise today's material & notes
Wednesday	Review Python Programming notes	Practice problems from textbook	Revise today's material & notes
Thursday	Review Python Programming notes	Practice problems from textbook	Revise today's material & notes
Friday	Review Python Programming notes	Practice problems from textbook	Revise today's material & notes
Saturday	Review Python Programming notes	Practice problems from textbook	Revise today's material & notes
Sunday	Review Python Programming notes	Practice problems from textbook	Revise today's material & notes

2-WEEK STUDY PLAN

Week 1 — Foundation & Weak Topics

- Day 1:** Monday: Focus on Python Programming
- Day 2:** Tuesday: Focus on Python Programming
- Day 3:** Wednesday: Focus on Python Programming
- Day 4:** Thursday: Focus on Python Programming
- Day 5:** Friday: Focus on Python Programming
- Day 6:** Saturday: Focus on Python Programming
- Day 7:** Sunday: Focus on Python Programming

Week 2 — Practice & Revision

- Day 1:** Monday: Practice problems & mock test preparation
- Day 2:** Tuesday: Practice problems & mock test preparation
- Day 3:** Wednesday: Practice problems & mock test preparation
- Day 4:** Thursday: Practice problems & mock test preparation
- Day 5:** Friday: Practice problems & mock test preparation
- Day 6:** Saturday: Practice problems & mock test preparation
- Day 7:** Sunday: Practice problems & mock test preparation

RECOMMENDED RESOURCES

- Python Programming textbook (recommended chapters)
- NPTEL online lectures
- Previous year question papers
- GeeksforGeeks / Khan Academy for concept clarity
- Self-made notes from classroom sessions

REVISION STRATEGY

- 1 Dedicate the first week entirely to weak topics
- 2 Use the Pomodoro technique: 25 min study + 5 min break
- 3 Summarize each topic in your own words after studying
- 4 Attempt at least 10 practice problems per topic
- 5 Do a full mock test in Week 2 before the exam

AI-GENERATED STUDY TIPS

- ! Your average of 80%+ means maintain momentum
- ! Study during your peak focus hours — usually morning for most students
- ! Teach concepts to someone else to validate your understanding
- ! Take short breaks to prevent mental fatigue during long sessions
- ! Track your progress daily and celebrate small wins

PROGRESS CHECKLIST

- ☐ Complete all weak topic notes
 - ☐ Solve 20 practice problems per weak topic
 - ☐ Attend all remaining classes before exam
 - ☐ Review previous year questions
 - ☐ Summarize each CO in 5 bullet points
 - ☐ Complete at least one full mock test
 - ☐ Revise formulas and key definitions
 - ☐ Create a mind map for each topic
 - ☐ Sleep 7-8 hours before exam day
 - ☐ Review all notes one day before exam
-
